

The fate of an epoch of presidency of Dmitry Medvedev: between democracy and tandemocracy

For the best understanding of the epoch of the third President of Russia Dmitry Medvedev (fig.1), as in previous cases, considered part of the Golden Section's spiral (Fibonacci's spiral) of Russian history, which includes the periods from 1985 to 2025.

Fig.1. The third Russian President Dmitry Medvedev

Such a curve is shown in Fig.2, and according to its preceding and subsequent periods, up to the current 2015 are indicated on the diagram in gray. Future events after 2015 in this diagram are marked by hatching and during the presidency of Dm. Medvedev highlighted black and clearly defined by the following two dates:

- 2007 – the year of nomination Dm. Medvedev for the post of first vice-premier of the Russian government and later presentation to the public and the nomination as a candidate for president of Russia;

- 2012 - the year of the expiration of presidential term Dmitry Medvedev.

So, from the point of view of the similarity with the previous period, which is widely used in these studies, during the presidency of Dm. Medvedev is unique follows. Firstly, it is the first after passing zero point Zero around 2005, and the completion of a zero cycle 2003-2007 and the beginning of a completely new and prolonged epoch-making stage associated with unwinding of historical cycles of Russia on the Fibonacci spiral.

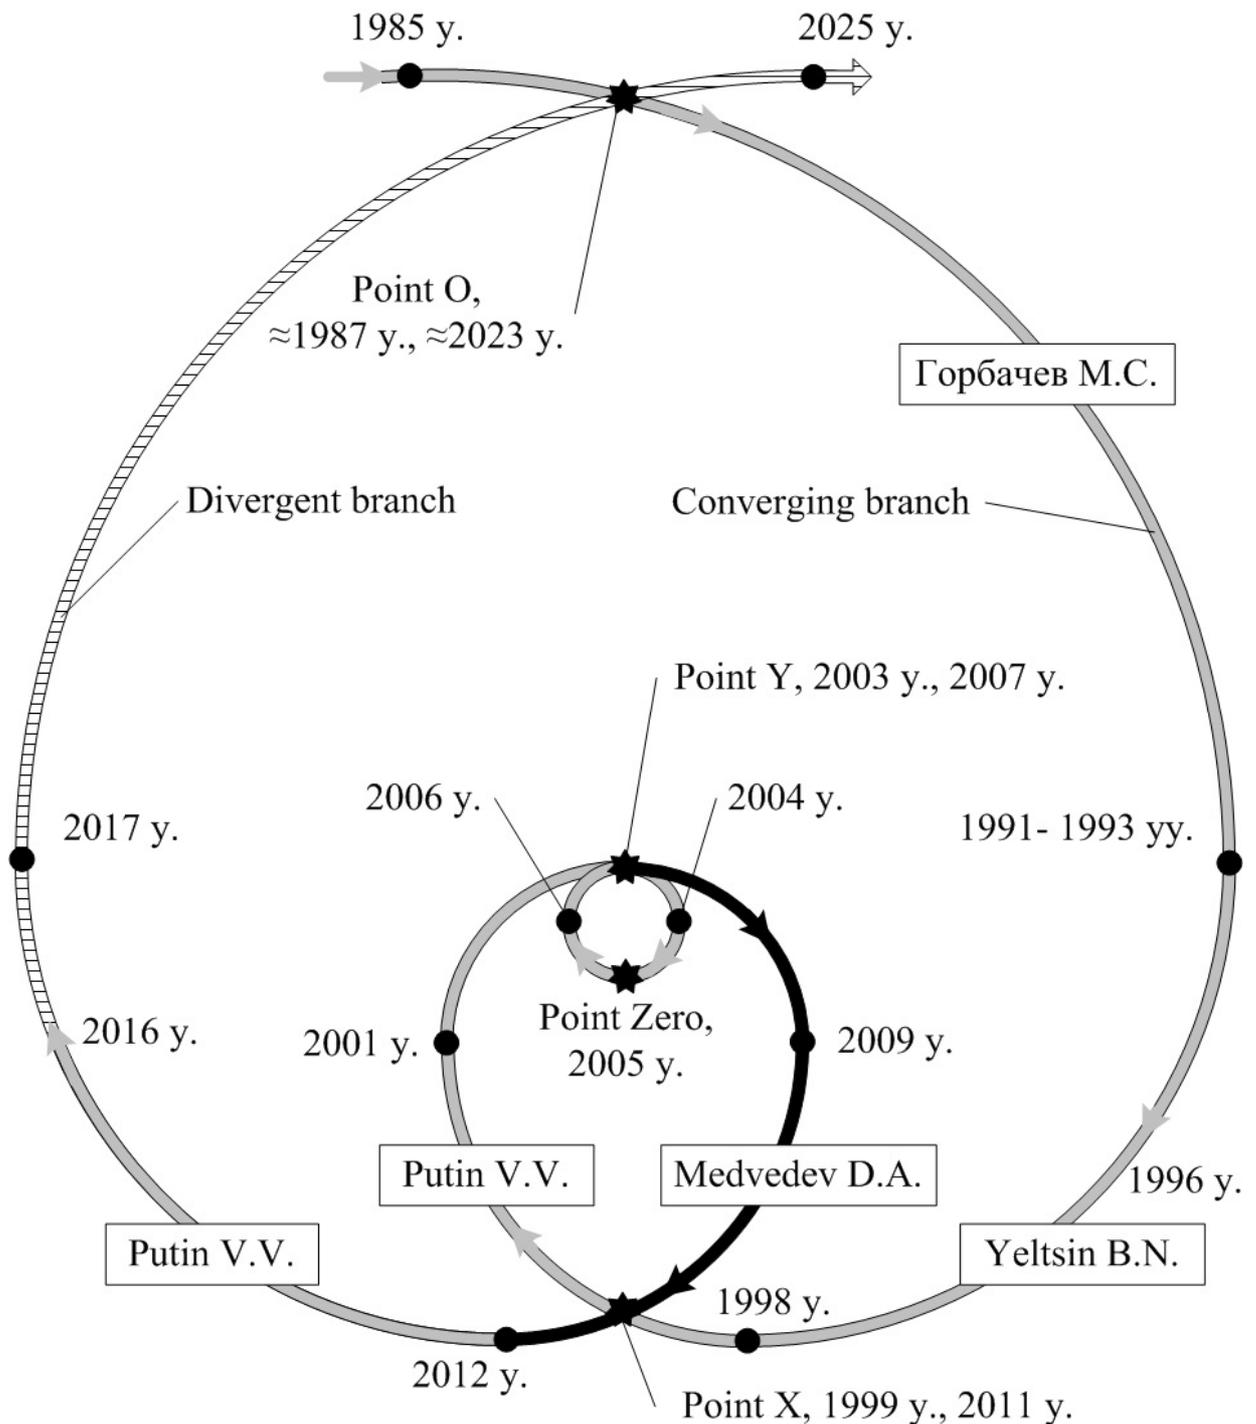

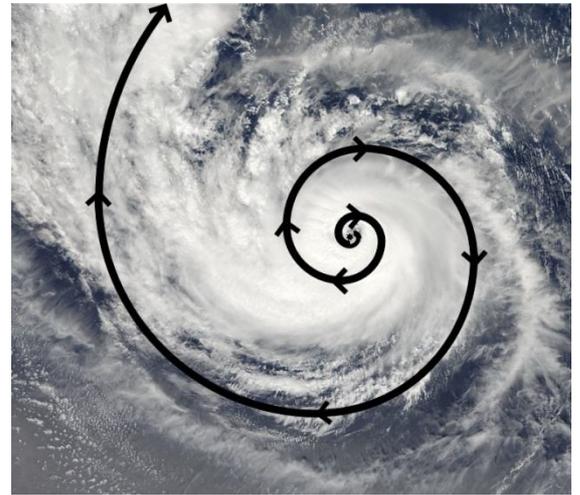

Fig. 2. Diagram part of the spiral of the Golden Section (Fibonacci cycles) in the history of Russia during the period of 1985-2025 years, near point Zero.

General view of the circular zero cycle 2003-2007, consisting of four annual cycles Fibonacci, and before and after it is best represented in the form of a spiral flow is twisted at the bottom and through the rotating cylindrical column, funnel outflow, ascended the top, followed by promotion. This can be compared, for example, a quantum transition (in terms of physics) or transition to a new level, orbit or orbital (as they say esoteric). However, probably the closest real way to this phenomenon, and the flat form shown in the diagram Figure 2 is a very

formidable natural phenomenon in the form of a tornado. His bottom funnel it connects the ground or water surface (Fig.3), spiral twisting streams and connected to the top of the sky, clouds and the spiral unwinding at the top (Fig. 3b). At the time of this tornado is sucked nearby surrounding objects and their removal, the ascension to the top.

a)

b)

Fig.3 Cyclone as a simplified image of a twisting funnel bottom ascension up and unwinding threads, like zero Fibonacci cycle in the period 2003-2007:

Fig.3a - side photo of the tornado, with helical twisting of the water surface and ascension up the cylindrical funnel, pillar;

Fig.3b - photo of a tornado on top, spiral unwinding airflows whirlwind of space, combined with the Fibonacci spiral.

Many people know that there are several types of tornadoes: like the whip, blurred, composite, fire, water, earth, snow. Typically, the transverse diameter of the funnel of a tornado in the lower section of 300-400 m. Inside the air funnel is lowered, and the outside rises rapidly rotating, creates a region of highly rarefied air. The vacuum is so significant that the closed gas-filled items, including buildings, the inside may explode due to pressure difference.

It is believed that the air speed in the funnel is greater than 18 m/s and may, in some indirect estimates of up to 1,300 km/h. Himself tornado moves along with its generating cloud. This movement speed may produce tens of km / h, typically 20-60 km/h. According to indirect estimates, the energy of a conventional tornado radius of 1 km and an average speed of 70 m/s comparable to the energy of the reference of the atomic bomb, like the one that exploded in the United States during the test, "Trinity" in New Mexico on July 16, 1945.

In Russia, one of the most known cases from the tornado occurred June 29, 1904 at 17 o'clock tornado in Moscow. He uprooted and twisted all the trees (some up to a meter in coverage) Annengofskaya's groves, caused damage to Lefortovo, Sokolniki, Basman Street, Mytishchi, sucked water from the Moscow River, exposing her bottom.

From a philosophical and historical point of view, the three parts of this can be explained as follows:

- (all events in Russia before 2003 are similar to the converging spirals on the earthly level, aspiring to a central focus) picking, combining the widest possible life experience, spiritual strength and power, stirring the gene pool of the different peoples and nationalities of Russia with the conversion, "remelting" it as the basis for a united and solid nation, accumulation and crystallization of the spiritual essence and potential of Russian (the wisdom of all abilities, comprehension of the will of the God, the experience embarrassing defeats and great victories, and many others) for the previous long nearly 12000 year period from the moment of confrontation and destruction of Hyperborea and Atlantis;

- (Zero cycle 2003-2007 - is rising from the earth to the sky rotating funnel) recovering accumulated and crystallized spiritual essence and potential of Russia and the Russians and the subsequent removal to a new, higher energy level to solve the new challenges of civilization;

- (Events in Russia after 2007 are likely to be similar to the spiral diverging from the central focus in the form of zero point Zero from the celestial level) solution Russia and Russians new civilizational challenges, the beginning of spiritual teaching, management and distribution of Russia and Russians invaluable experience accumulation and crystallization spiritual and material among other nations.

Secondly, for some simplification, it can be assumed that the complex and contradictory nature of the era of Medvedev's presidency most strongly influenced by two main periods:

- the period of 1985-1999 years under the rule of Mikhail Gorbachev Boris Yeltsin, and that distinguishes, in general, more or less democratic foundation of government. This period is almost like a discussion, because It takes a similar sector (corner) on the previous branch of its Fibonacci spiral.

- The period of 1999-2007, when Putin's rule The peculiarity of this period is "full chronological mirroring" events of 1999-2003 to the events of 2007-2011, ie, Events of the last period should be similar events in their reverse chronological arrangement, ie, from 2003 to 1999.

Complex influence during the reign of Dm. Medvedev these different periods in essence the history of Russia, reduced several times, apparently caused his complex and controversial. It is fair to say that these contradictions can be seen only in a "microscope".

Detailed examination of all these nuances, based on the manifestation of the Fibonacci cycles in the history of Russia, devoted to the subsequent material.

The generality of the Gorbachev's-Yeltsin's epoch and Dmitry Medvedev's epoch

For an objective and a visual representation of the total between the period during the reign of Mikhail Gorbachev and Boris Yeltsin in the years 1985-1999 in the Soviet-era and Russian Dmitry Medvedev's presidency represent historical events characteristic of analogies and parallels forth in tabular form.

Historical parallels connecting the epoch's Gorbachev-Yeltsin and the
presidency of Dmitry Medvedev

| Gorbachev-Yeltsin's epoch 1985-1999 yy. | Medvedev's epoch 2007-2012 yy. |
|---|--|
| Beginning era of openness and transparency in 1985 | The Declaration on the commitment to democracy in 2008 y. |
| Restructuring and Acceleration | "Forward Russia!", Modernization and nanotechnology |
| Anti-alcohol company | Introduction of "dry" law for drivers |
| Moscow International Festival in 1986 | "All-Russian fortune" in the cultural - Sport activities |
| Silver medal at the European football championship in 1988 | Bronze medal at the European Championships football in 2008 |
| Trade deficit, the crisis of the USSR economy, the effects of shock therapy, default of 1998 | Financial crisis in 2008 |
| Tbilisi events, 1989 y., the Georgian-South Ossetian conflict, the Georgian-Abkhazian conflict | Armed conflict in South Ossetia in 2008 |
| Forming a new relationship with the US and with the West | "Reset" relations with Russia US |
| Disarmament USSR and Russia with the United States under Gorbachev MS and Boris Yeltsin | Signing the agreement on START-III |
| Events 3-4 October 1993 | Riots on Manezhnaya Square because of the murder of Yegor Sviridov in 2010 |
| Election fight with the leaders of the party "Otechestvo-Vsya Russia" Primakov E.M., Luzhkov Y.M. | The struggle with the opposition (Navalny, Nemtsov, Kasyanov, Yashin ...) because of the results of the elections to the State Duma in 2011 |
| Voluntary transfer of power from Boris Yeltsin to Vladimir Putin | Voluntary abandonment to run for a second time of the post of president of the Russian Federation and the nomination of a candidate for President Vladimir Putin |

Of course, it is impossible to compare eras come to the «pharmacy's high accuracy», but there is a very high similarity and their correlation. Some of them will be presented in more detail further.

The generality of the Putin era VV and the presidency of Medvedev DA

One day Vladimir Putin spoke about the relations with President Medvedev: "We are people of the same blood and the same political views." This is perhaps the most succinct expression of the relationship of these two leading Russian politicians, "political heavyweights". Both politicians from St. Petersburg, both graduated from Law Department of Leningrad State University, both studied under the administration by Anatoly Sobchak, who later in the early 90s, when he was mayor of the northern capital, gave them a "ticket to a new life" and both also belong to the so-called St. Petersburg team.

It is therefore natural that the entire period of the presidency of Dmitry Medvedev, during the premiership of Vladimir Putin, like a "player-coach" was strongly "impregnated" the spirit of his predecessor.

However, do not make final conclusions and still check the version on the impact of the events with the USSR-Russia previous Fibonacci cycles branches period of 1985-1999 years during the reign of Mikhail Gorbachev and BN Yeltsin

2008 as a year of "All-Russian fortune"

So, a unique period in 2008, mainly starting from spring until 8 August, can be identified as probably the busiest in Russia bright memorable events, which include the following:

- elections on March 2, and the inauguration of the new third Russian President Dmitry Medvedev on May 7;
- Basketball club "CSKA" (Moscow) wins Euroleague.
- "Zenit" (St. Petersburg) won the UEFA Cup 2008
- Russian national team won the final match at the Ice Hockey World Championship 2008
- Zvenigorod "Star" became the winner of the EHF Champions League,
- Dmitry Bilan wins the Eurovision Song Contest final 2008 - the first time in the history of the competition victory goes to Russian singer;
- Russian team won the third place and the bronze medal in the European football championship. The last such success occurred in 1988 in the USSR, when the European Championship finals in Munich (Germany) met teams of the USSR and the Netherlands. Champion became the Dutch national team, having beaten the USSR national team with the score 2: 0.
- Ksenia Sukhinova won the title of "Miss World 2008" at the 58th International beauty contest in Johannesburg;

The list goes on successful performance at the Beijing Olympics in 2008, where the Russian Olympic team won 23 gold, 21 silver and 29 bronze medals in the team event and won an honorable 3rd place.

List of the events that had blighted the year 2008 consists of the following events: the beginning of the financial crisis, the armed conflict in South Ossetia, the death of the Patriarch of the Russian Orthodox Church Alexy II.

Russian Orthodox Church Patriarch Alexy II of Death was a heavy blow to the whole congregation, all the Orthodox, for the whole of the Russian people.

In connection with the above, we can say that from spring to August 8, 2008 was the so-called state of the country "All-Russian success" irrationally associated with long-period of euphoria, the beginning of perestroika Gorbachev came to power, MS in 1985 year. Since the beginning of the South Ossetian conflict in 2008, this "All-Russian success" ended and life began to return to the "average reality" ...

The armed conflict in South Ossetia

All events the whole chronology of the South Ossetian conflict in 2008 the media has "studied up and down", so perhaps there is no need to engage in a well-known renderings. In terms of subject matter of the book is more important to identify the irrational links between different branches of the Fibonacci cycles that could prejudice these events.

It is fashionable to assume that these events are an echo of Tbilisi together the events of 1989, the Georgian-South Ossetian conflict, Georgian-Abkhazian conflict in the so-called Democratic era of Gorbachev-Yeltsin.

On the other hand, in accordance with the diagram in Fig.1 shows that with the events of 2008 can be connected prior to the tragic events of war and terrorist attacks: in 2002, 2004, the era of Vladimir Putin.

The tragic events of 2002.

- May 9 terrorist act in Kaspiysk, killing 45 people and about 170 were injured varying degrees of severity;

- October 23-26, monstrous and terrible, the hostage-taking of more than 800 spectators and actors of the musical "Nord-Ost" in the Dubrovka, killing 129 people;

- 10 October, the attack to the police department building in Grozny, killing 20 policemen, including - all the heads of the police department.

- On December 27 terrorist attacks in Grozny, the terrorist attack at the Government House, 83 persons were killed and over 135 injured.

The tragic events of 2004.

- May 9 terrorist attack during the 59th anniversary of Victory Day in Grozny at the stadium, killed Chechen President Akhmad Kadyrov;

- 21-22 August 2004, the invasion of Grozny squad of militants numbering more than 200 people, killed more than 100 people;

- 24 August 2004, blown up two passenger plane taking off from Moscow's Domodedovo airport to Sochi and Volgograd, killing 90 people;

- 1 September 2004, the school seizure by militants in Beslan (North Ossetia), hold more than 1128 hostages

- mostly children, their parents and school staff, killing 333 people, including 186 children and more than 800 wounded.

Thus, we can assume that all acts of terrorism and acts of aggression ages Gorbachev-Yeltsin and Vladimir Putin echoes of his "shot" together in 2008 as the South Ossetian conflict during the reign of Dmitry Medvedev And it seems that no matter what happens this is likely to happen is something else like that

Freedom is better than non-freedom

"Freedom is better than non-freedom" - is the most famous sentence of Dm. Medvedev, whom he had at the beginning of his presidency, declared commitment to democratic values. Perhaps this statement and its other democratic actions has been taken a long relationship with the previous democratic era of Gorbachev-Yeltsin years 1985-1999.

Restructuring and acceleration –

"Forward Russia!", Modernization and nanotechnology

Report Dmitry Medvedev's "Forward Russia!" gave the general way and declared his reformist actions. And that reminded many events nearly 25 years ago, associated with the name of Mikhail Gorbachev and restructuring and acceleration. And the historical analogy, related to the restructuring and modernization of 2-all seemed full of historical "DEJAVU".

It was also stated goal of creating a Science City as a center of nanotechnology in Skolkovo. It is planned to organize a center for research on the most promising areas like the American Silicon Valley in California. During an official visit to the United States for Dmitry Medvedev it organized a special trip to the American center of new technologies, as well as visits of Apple and communication with its creator and leader Steve Jobs (Fig. 4). Today, this initiative is dissolved into the general stream of accusations, critics of sanctions and war against Russia.

Fig.4. The third Russian President Dmitry Medvedev with Steve Jobs when he visited the company Apple (USA)

Disarmament in the Gorbachev-Yeltsin and Medvedev D.A.

In 1987, the General Secretary of the CPSU Central Committee Mikhail Gorbachev and US President Ronald Reagan signed the indefinite Intermediate-Range Nuclear Forces Treaty.

In early 1993, Russian President Boris Yeltsin and US President George W. Bush signed the Treaty on Strategic Offensive Reductions START-II. According to the agreement prohibits the use of ballistic missiles with multiple warheads.

April 8, 2010 in Prague by Presidents Dmitry Medvedev and Barack Obama signed a bilateral agreement between Russia and the United States on further mutual reduction of arsenals of deployed strategic nuclear weapons START-III.

As you can see, the above-mentioned events confirm the commonality between the era of Dmitry Medvedev and previous long-term democratic era 1985-1999 years and its leader, Mikhail Gorbachev and Boris Yeltsin does not end there.

The financial crisis

The 2008 financial crisis started in the United States before the presidential election and had a heavy impact on the entire global financial sector. Effects of the crisis affected the Russian economy in the form of payments crisis and emerging crisis of the banking sector. And although after 5-6 years after its start, many economists in their reviews and forecasts mentioned still persist its consequences.

The appearance of a mass circulation media the word "crisis" will automatically cause the Russians have unpleasant associations with all the "attributes" the era of Mikhail Gorbachev's perestroika and Boris Yeltsin's reforms: the trade deficit, the crisis of the Soviet economy, the effects of shock therapy, the default 1998.

But thank God, the crisis did not go on the worst-case scenario because of the stock of foreign exchange reserves accumulated in times of Vladimir Putin.

Mikhail Khodorkovsky's court case

Mikhail Khodorkovsky's court case is indicative of the reign of Dm. Medvedev. With all the features of Khodorkovsky amnesty, even at the very end of his presidency, for example, in 2012, corresponding to most of the prison term. It was at this time the people have formed a clear view, to equate it to the political prisoners.

This action not only in words, but in fact could be the final chord of his presidency remarkable and most importantly, could identify even more epoch Dmitry Medvedev with the democratic era, when Mikhail Gorbachev Sakharov A.D. freed Nizhny Novgorod's exile.

However, this was not done and, moreover, in 2010-2011 Mikhail Khodorkovsky He was additionally sentenced under the new circumstances. The general term, appointed by the court, taking into account the subsequent appeals increased to 10 years and 10 months.

This no doubt is possible to consider the influence of the Second President of Russia Putin V.V. He was the initiator of the arrest of Mikhail Khodorkovsky andonly he and not someone else, and could allow him amnesty.

The price of oil and gold reserves

Another historical parallel, which strongly binds the era of Putin V.V. and Medvedev D.A. - the price of oil and the amount of stocks of foreign exchange reserves (FER).

If the average price for oil grade Urals (Russia) at the end of Boris Yeltsin in 1999 was only \$ 17.7 per barrel, while the volume of FER tend to zero, then in 2012 during the presidency of Dmitry Medvedev the price for oil has exceeded - \$ 100 per barrel, and the volume of FER has become very solid. Here, as they say, feel the difference ...

Democracy in exchange for wealth and standard of livingk unfortunately, combine both elements have not yet succeeded.

Key events of the times of Russian President Dmitry Medvedev

To assess the general atmosphere in the country is also to list a few iconic, resonant events, unfortunately, negative connotations that will be remembered for the political epoch of the reign of the third President of Russia Dmitry Medvedev.

Among these events are two man-made accident at the Sayano-Shushenskaya hydroelectric power plant and the mine "Raspadskaya", the massacre in the village Kushchevskaya Krasnodar Territory and heat waves in 2010 in the European part of Russia.

During the reign Medvedev took place two large man-made accident: at the power plant (17 August 2009), and two explosions at the largest coal mine "Raspadskaya" (8-9 May 2010). The number of dead and injured in the first case was 75 and 13, while the second - 91 and 99.

If we denote the date of the incident on 17 August 2009. (The Sayano-Shushenskaya HES) and on May 8-9, 2010 (coal mine "Raspadskaya") on Fibonacci spiral branches period 2007-2012, it is easy to see the alternative position almost another tragic event - the death of the submarine "Kursk", which occurred in August 2000 during Putin's first term. This strange "mirroring" the tragic events of the last irrational links between Putin's first term and epoch Medvedev to central zero cycle 2003-2007.

Using the similarity of historical cycles on different branches of the Fibonacci spiral can be assumed that, unfortunately, the analogues of these developments will be reflected in the future, especially in the period from 2025 to 2059. God grant that here investigated irrational connection did not appear ...

New trends in Russia under President Dmitry Medvedev

Update governors. According to preliminary estimates, during the presidency of Dmitry Medvedev replaced 42 of the 85 governors, ie $\approx 50\%$ of all of the governor's staff. It is particularly important that resigned many "political heavyweights" and governors-centenarians: M. Shaimiev (Tatarstan), M. Rakhimov (Bashkortostan), Luzhkov Y.M. (Moscow), Polezhaev L.K. (Omsk), ES Stroyev E.S. (Orel).

The growth of the Russian population. According to many observers a major achievement of President Medvedev DA It was the growth and stabilization of the population of the Russian Federation. In 2008-2011, Russia has achieved one of the highest rates of several decades. Families, give birth to a second child, has

increased by 45%, the third - 62%. The population of Russia in 2011 exceeded 143 million people.

Voluntary transfer of supreme power to Vladimir Putin

Regardless of the estimates on the transfer of power from the third president of Russia Dmitry Medvedev to Putin V.V. in terms of the Fibonacci cycles in Russian history this event is outside, in nature and chronologically coincides with the transfer of power from Boris Yeltsin to Vladimir Putin in 1999 (Fig.5). For this study, it is important to note that both of these events form the point X with the dates 1999 and 2011 on the chart Fibonacci spiral (Fig.2).

Fig.5 Transfer supreme power to Putin V.V.:

a) after Yeltsin's voluntary exit from post of president of the Russian Federation, 31.12.1999 r .;

b) after a Medvedev's voluntary abandonment to run for a second time of the post of president of the Russian Federation, was 24.09.2011

Conclusion

As can be seen from the material presented epoch of the presidency of Dmitry Medvedev, in fact, is the most controversial, because united and reflected the effect of the three very different presidents of the USSR and Russia: long open democratic era of Gorbachev-Yeltsin period 1985-1999 years and epochs VV Putin the period 1999-2007.

This basic contradiction lies in the fact that despite the seemingly maximum impact of its predecessor, without exaggeration, the most influential politician in Russia and the world in the status of the current Prime Minister of Russia Vladimir Putin, the overall scenario and the sequence of most of the events the era of President Dmitry Medvedev in the first place strongly correlates with the recent democratic era of Gorbachev-Yeltsin years 1985-1999. Those tandem Dm. Medvedev (President) - Vladimir Putin (Prime Minister) "practiced" events, most of which is the "echo" of the previous era of Gorbachev-Yeltsin. And perhaps our happiness consists in the fact that at this time "involved in the game," two such

political heavyweights as well as the fact that Russia has passed the zero point Zero. And it is not given serious devastating consequences for the country in the period 1985-1999 years. Therefore, the slogan of this can be formulated as "democracy in exchange for prosperity and living standards". Perhaps combine these two manage to start a strong Russia in the future

Today, in our days can be noted that the beginning of this presidency became apparent to all Russians from the very first days, exploded in the positive sense of the general atmosphere in the country, the so-called "All-Russia fortune" from spring to August 8 (the beginning of the South Ossetian conflict), 2008. It was like a general euphoria of the first months of 1985, when after 3 years a series of funerals general secretaries people spellbound could not "come unstuck" from the TV during the show open telegenic young outgoing young general secretary Mikhail Gorbachev.

And it ends with the presidency of Dmitry Medvedev a voluntary transfer of power to Putin VV and the beginning of mass unrest related to the elections to the State Duma, and the struggle with the opposition. Almost as nearly 12 years ago, in late 1999, through the media election campaign was conducted with the leaders of alternative party "Otechestvo-Vsya Russia" Luzhkov Y.M. and Primakov E.M., and on 31 December the voluntary transfer of supreme power from Boris Yeltsin to Vladimir Putin. No one expected such neither the first nor the second case ...

So, from the "All-Russia fortune" to the voluntary transfer of supreme power - that is the interval between these key events, and all passed the presidency of our hero.

Anyone can also add that the presidency of Dmitry Medvedev - this is a small democratic period of the general presidency of Vladimir Putin.

In fairness, it should be noted that many of the initiatives taken by Dmitry Medvedev, according to the likeness of the relevant branches of the Fibonacci spiral, designating a whole new stage of life in Russia, will be developed in the next period of Russia with 2025-2059 years. And perhaps young people have lived up to that time, it will catch the beginning of the Golden Age in Russia, which says a lot about the visionaries and will be able to confirm this forecast author.
